Crystalline[®]

railing system

Glass balustrade systems, highly aesthetic with maximum stability

CRYSTAL LINE glass balustrades create an almost invisible barrier between the viewer and the view. There is no limitation of lengths or sizes and requires no posts or handrails at all. The safety of our products is constantly tested at our own laboratory as well as through leading international laboratories.

We offer more than 16 different solutions for glass balustrades to select from, suitable for all types of installation. Available in anodized finishes as well as powder coated, with the option of top handrail.

More than 200 projects around the world have chosen to implement CRYSTAL LINE glass balustrades in their buildings, and the list is growing. The most stringent safety requirements for strength and quality are met and guaranteed as CRYSTAL LINE has received multiple certifications for its performance.
